Professional Summary

Software Engineer with 3+ years of experience delivering enterprise-grade solutions across payroll, healthcare, fintech, logistics, and real-estate domains. Skilled in C#, .NET, Java, Kotlin, Angular, React, Spring Boot, SQL Server, and REST API development. Experienced in optimizing complex business workflows, modernizing legacy systems, improving database performance, and delivering production-ready features in Agile environments.

Technical Skills

Languages:	C#, Java, Kotlin, TypeScript, JavaScript, SQL, PHP
Backend:	.NET Core, ASP.NET Core, Spring Boot, Spring Data JPA, Spring Security, REST APIs, Microservices
Frontend:	Angular, ReactJS, TypeScript, HTML, CSS
Databases:	SQL Server, PostgreSQL, MySQL, MongoDB
DevOps & Tools:	Git, Docker, Postman, Swagger/OpenAPI, GitHub Actions, Azure DevOps, CI/CD Pipelines
Other:	JWT, OAuth2, Agile/Scrum, API Integration, Performance Optimization

Professional Experience

Software Engineer — **Sep 2025 – Present**
Mazilytics — *Karachi, Pakistan*

- Worked on enterprise payroll and healthcare software systems using .NET, C#, Angular, React, SQL Server, and CI/CD workflows.
- Optimized SQL Server stored procedures and payroll processing workflows, reducing database locking and improving execution performance.
- Investigated and resolved production issues related to payroll output generation, tax processing, validation rules, and reporting workflows.
- Contributed to healthcare platform enhancements across anesthesia, perfusion, patient workflow, and clinical reporting modules.
- Supported migration from React/Ionic to Angular by implementing authentication, API integration, responsive UI improvements, and feature parity.
- Collaborated with QA, Product Owners, and cross-functional engineering teams to deliver production-ready fixes and enhancements.

Backend Developer (PHP) — **Jun 2025 – Sep 2025**
Techroot.ca — *Karachi, Pakistan*

- Developed Project ReVux, a real-estate platform with property listings, authentication, booking workflows, payment integration, and geolocation services.
- Built RESTful PHP modules and optimized MySQL queries and caching, reducing page load time by approximately 30%.
- Collaborated with frontend and QA teams in Agile sprints, wrote unit tests, and supported production releases.

Fullstack Developer (Contract) — **Apr 2025 – May 2025**
Binary Axon — *Karachi, Pakistan*

- Delivered .NET Core REST APIs and ReactJS + TypeScript interfaces for business applications.
- Implemented JWT-based authentication, integrated third-party services, and optimized PostgreSQL schemas.
- Participated in code reviews, Agile sprint planning, debugging, and production release activities.

Backend Developer (Java & Kotlin) **Aug 2023 – Feb 2025**
SSSCO *Karachi, Pakistan*

- Developed and maintained Spring Boot microservices for logistics, fintech, onboarding, and customer identity workflows.
- Refactored legacy Java code to Kotlin and integrated external APIs including Google Maps and Bluetooth services.
- Implemented secure REST APIs using Spring Security, JWT, and database-driven business logic.
- Configured CI/CD pipelines using GitHub Actions and collaborated with mobile, QA, and backend teams.

Web Developer Intern **Apr 2023 – Jun 2023**
LamTans *Karachi, Pakistan*

- Customized WordPress themes and plugins using PHP, JavaScript, HTML, and CSS.
- Delivered responsive and SEO-friendly templates for small business clients.

Key Projects

Enterprise Payroll Platform
Worked on payroll processing, disbursement workflows, tax form handling, validation rules, SQL optimization, and production issue resolution using .NET, C#, and SQL Server.

Healthcare Workflow Platform
Contributed to Angular, React, and .NET-based healthcare modules involving patient questionnaires, anesthesia workflows, perfusion workflows, clinical reporting, and CI/CD pipeline improvements.

Rize MY Fintech App
Developed Java Spring Boot APIs for onboarding, KYC, authentication, and transaction-related workflows. Integrated secure API flows using Spring Security and JWT.

Project ReVux
Built backend modules for a real-estate platform including listings, bookings, payment integration, geolocation APIs, MySQL optimization, and caching improvements.

School Management System
Developed full-stack features using .NET Core and ReactJS, including user roles, attendance, scheduling, and secure admin panel functionality.

Education

Bachelor of Business Administration (BBA) **Feb 2025**
KASB Institute of Technology *Karachi, Pakistan* GPA: 3.45 / 4.0

ACCP Diploma in Software Programming **Mar 2023**
Aptech *Karachi, Pakistan* Grade: B+

Recognition

3rd Place – Aptech All Asia Coding Competition

Languages

English, Urdu
